

## Chapter 1: The Most Magnificent Spiritual Truth I've Ever Read

Christ is the creator of this illusory universe, *not* God. He had been given all the creative powers of the Father and innocently wondered what it would be like to live in a universe of time and space that was separate from God. This existence would be based upon duality rather than unity. The Course calls this a “tiny, mad idea”. For a first, Christ had an idea that was *not* shared by God as He imagined what it would be like to be apart from His Creator. Forgetting to laugh about that silly idea and feeling guilty, He experienced something new. Fear. The first ego was created and is a mind that falsely believes it is forever on its own. God knows absolutely nothing about this, since in nonduality there is only a constant, unchangeable Oneness. Christ made this universe through the Big Bang, composed of billions of fragments to hide from the supposed wrath of a vengeful Father. The idea of duality could not be carried out in God’s Reality, so Christ created a universe of illusion and entered it as if falling asleep and dreaming. The trouble was that He went into such a deep state of sleep that He had no awareness of dreaming, so He accepted the universe of illusion as real

and completely forgot His true Home in the Celestial Realm. This created a barrier in communication between the Father and the Son so deep that God decided a correction was necessary. God's extension outward, though not His completeness, was blocked when the Son stopped communicating with Him as One. Our Father thought, "My Child is asleep and must be awakened." So God wanted to awaken His Son, but there was a major problem. Whatever God places His attention on becomes as if it is real. If God entered the dream to redeem Christ, then the dream could potentially become real to Him as well, and He would also be trapped. There would be the risk of both the Father and the Son becoming eternally separated from their true Home, eternally losing Their Identity. To solve the problem and allow God to keep His attention focused on Reality, He created a special agent. The Holy Spirit would be a bridge between the two states of existence and The Answer to the falsely perceived separation. The Voice for God is the Mediator between perception and knowledge. Without this link, perception would have replaced knowledge forever in Christ's Mind. With this link, perception will become so changed and purified that it will lead to understanding. The Holy Spirit entered the sleeping Mind of Christ with the ability to see His imperfect dream while simultaneously viewing God's perfect Heaven. Christ was healed due to His remembrance of God's eternal Love and woke up in the Heaven He'd never left. Therefore, we are *all* split off parts of the One Christ Mind because the Course repeatedly asserts there can only be One Son. Unity can only create unity and multiplicity cannot originate from Oneness. If all His creations are His Sons, everyone must be an integral part of the whole Sonship. The Sonship in its Oneness transcends the sum of its parts. Therefore, the term Sons of God is used by Jesus for convenience in addressing his students as they believe they are. On the other hand, the Son of God is the term used to denote who we truly are as Christ, the Identity of Oneness we shall awaken to after our dream of multiplicity is undone. Miraculously the same unchangeable Holy Spirit is in all 8 billion minds alive today. The Voice utilizes the exact same methods to

awaken us as used with the original Christ. The ego created the illusion of time and space to keep the Sons of God (Us) from remembering Our true spiritual identity. All of humanity is bipolar with our right mind based on spirit and love. Our wrong mind is based on ego and fear. The Holy Spirit is always silently but powerfully assisting Us to choose love over fear. Perception is the domain of the ego and is *always* false. As we daily become more adept at listening to the Voice for God we'll find ourselves growing into a frame of mind which naturally forgives even the smallest egotistic attacks. We'll forgive colds, muscle aches, all sickness etc.etc. The "state of the world" becomes of very little concern because we're slowly but oh so surely waking up. When we have achieved perfection in forgiveness and find ourselves being truly happy, our ego will vanish into the nothingness from which it came, and we'll awaken in the Heaven we've never left. So as goes the original Christ we follow because this is the Will of God. Now that we have been informed of the most profound spiritual truth ever written, let us reason together to try and determine what this actually *means* in the year 2025. A Course In Miracles states that it cannot be adequately explained what Love actually *is*, however, with logic and reasoning we are given glimpses. Imagine a Love that Is absolutely perfect, beyond purity, immeasurably magnificent and possessing immense eternal power. This Love is all knowing, all seeing, everywhere, outside of time, forever unchanging and cannot conceive of any loss. A Love that eternally gives unlimited joy and happiness, and is totally complete in and of Itself. Always offering a perfect light that extends to all existence for all eternity. *We are a part of this even in our illusory dream existence.* Every time we hold open a door, offer our place in line, give back too much change, turn the other cheek, help the elderly, contribute sound advice, assist the poor, go the extra mile, we're giving unconditional love. Love is not an emotion but the most powerful Force in all of God's perfect Creation and our forgiveness is the most powerful force in this dream universe. See you in Heaven. Bob
